Augmented reality

The potential applications of Augmented Reality in the promotional market

There is a lot of talk about Augmented Reality (AR) which has been a part of our daily life for some time, but what does it mean to make the most of this opportunity within the promotional market?

The technology now plays an important role: imagine scanning a QR code on a product sheet with a tablet or smartphone, the system recognising it and then perfectly mapping it to the reality that the person is experiencing at that precise moment. Or during a

presentation, when putting together a brief, to gather concrete ideas about a project.

We have always been naturally oriented towards innovation, towards the future, and we were ready to include AR in our product launches.

Augmented Reality has already been integrated in several other areas, predominantly in entertainment, and now in the world of corporate gadgets: a new tool to bridge the gap between

the company and its customers in a market where being "global" is not only a mere aspect, but an essential requirement.

AR technology has now become a fully fledged form of visual content management, allowing us to add a new dimension of information to our products by enabling customers to interact with them on a deeper level.

This has begun a revolution in the Customer Experience, with our products now able to be seen in real physical contexts to aid customers in

their selection processes, guided by the highly informative approach that sets us apart.

One thing is for certain: the status quo is ready to be turned on its head, and Augmented Reality will enable us to develop an ever wider array of applications with our imagination and creativity.

Brand

The family of brands we have chosen to collaborate with is constantly growing. Each brand is selected with care and attention, and our partners entrust us with their best products. Rollink, PopSockets, SBS, Mokavit, and iDrink are the brands that are part of our collection. And you know what? In this section, you'll also find Elements, the first brand entirely conceived and created by us, and Firstimers, the brand of "first times."

firstimers

Wander

Wander is the perfect cabin-size backpack for any experience, thanks to its 21-liter capacity and compact design. Made of durable 600D RPET fabric with PU coating, a sustainable and robust material, it is ideal for any occasion. Suitable for travel and daily life, it features a practical external water bottle holder to keep you hydrated wherever you are and reflective details to ensure safety and visibility even at night. Fully customizable with logos through laser engraving, this backpack combines style, functionality, and safety, becoming your indispensable ally for every trip or daily adventure.

The original PopSockets® as a corporate gift!

PopGrip Basic
GD040

Choose quality! PopSockets® is a highly popular gadget on the market. Our catalog is where you'll find the patented and certified original version. The famous smartphone and tablet support is now available as a promotional gadget that can be customised with company logos or graphics.

SIZE	Ø 4,0 cm
MATERIALS	Plastic
PRINT	Matt CMYK, Glossy CMYK

Custom pack
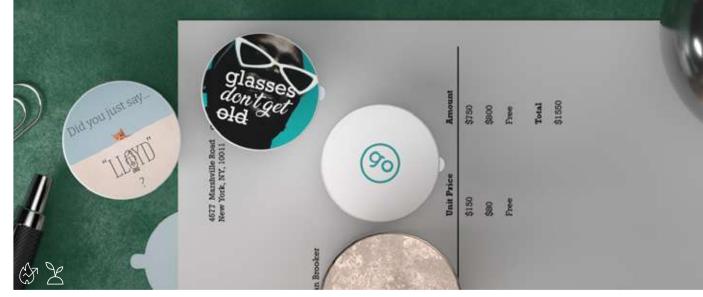

Starting from only 120pcs.

PopGrip

PopGrip Swappable is the version with interchangeable disc of the famous PopSockets®, the patented smartphone grip/stand that can be customised with a company logo for promotional use. The fact that you can swap the disc (PopTop) makes this accessory incredibly versatile: you can still use the PopGrip (which has a universal connection) and swap the PopTop to change colours, images or materials. It is also the ideal solution for smartphones compatible with wireless charging: simply remove the PopTop and place the mobile on the charger.

SIZE   Ø 4,0 cm
MATERIALS   Plastic
PRINT   Matt CMYK, Glossy CMYK

PopGrip Plant

PopGrip Plant is the green variant of the famous PopSockets®, the patented smartphone holder that can be customized with a company logo for promotional use. Its peculiarity is that it is made with at least 1/3 of completely recyclable materials of vegetable origin, such as corn starch, castor beans and canola oil. Once attached on the back of the device, PopGrip becomes a practical support to keep the phone in an upright position, or a comfortable grip allowing to grab it with just one hand and write messages, watch videos or take photos. It also works as a cable reel to keep cables or earphones tidy.

Drinkware

There are many reasons to choose a water bottle from the our catalogue. The most relevant is the huge variety of options to choose from: we have a genuinely comprehensive range to cover all price brackets, technological levels, material types, brands and technical performance levels.

Bloom

GD063

Elegant 450 ml thermal bottle made of 304 stainless steel with a cylindrical shape and glossy finish. The special feature of this bottle is the contrasting cap with a matte finish, button shape, and equipped with a convenient strap that, thanks to the loop, makes it easy to carry during various trips. It can be customized with logos and graphics using laser engraving and digital printing.

CAPACITY	450 ml
SIZE	6,5 × 22,0 cm
MATERIALS	Stainless Steel

Flask

GD051

500 ml compressible water bottle made of soft-touch silicone. The possibility of folding this water bottle makes it easier to carry even when space is limited, and its material makes it a light and durable accessory. The Flask water bottle is available in four different colours - black, grey, blue and light blue - and can also be customised with logos and graphics using the pad printing technique.

CAPACITY	500 ml
SIZE	27 × 9,0 cm
MATERIALS	TPU
PRINT	Pad printing

Eco-friendly drinkware for responsible hydration

Eco-friendly water bottles are made from recycled materials and have a low environmental impact, reducing the need to extract new natural resources. For example, many of these are made from high-quality stainless steel sourced from recycled materials to minimize carbon footprint and energy consumption required for production.

Additionally, water bottles are often free from harmful chemicals such as BPA (bisphenol A), which is found in many conventional plastic bottles. BPA is a toxic component that can leach into the beverage and have negative effects on human health. Today, it is important to provide a safe and chemical-free alternative, allowing people to drink water or other beverages without concerns.

One of the main advantages is their durability. Unlike disposable plastic bottles that easily break or deteriorate over time, eco-friendly ones are designed to last. This means that you can use the same bottle for years, reducing consumption and waste disposal.

Some of these offer additional features to encourage a healthy lifestyle. For example, they may have built-in filters that purify water from non-potable sources, eliminating the need to purchase bottled water. There are also smart devices that can control the water temperature inside the bottle or utilize UV technology to sanitize the contents. The multifunctional design can also allow for easy and thorough cleaning, preventing bacterial buildup and prolonging the lifespan of the product.

RPET Clear

GD050

600ml water bottle made from rPET material. This material is a sustainable alternative, as its composition is 100% recycled PET, making it more resource-efficient than regular plastic. This material makes for a lightweight, durable and transparent water bottle, while reducing the CO_2 emissions of the production process. The product can be customised using digital printing, and an additional advantage is its delivery time: it is dispatched from our premises within 24/48 hours after order confirmation, and delivery takes 24 or 72 hours depending on the destination.

CAPACITY	600ml
SIZE	23,0 × 6,8 cm
MATERIALS	rPET

Hoco

Double-walled stainless steel thermal bottle with a capacity of 500 ml. Stainless steel is the most suitable material for water bottles as it is resistant to oxidation and corrosion, and therefore doesn't release any substance or contaminate the contents. Furthermore, due to its low conductive capacity, it can be considered a genuine thermal insulator. This feature is enhanced by the body of this bottle: a double layer separated by an air chamber, able to keep the contents hot for up to 12h, and cold for up to 24h. Hoco is available in the natural gray color of steel, in red, blue, white and anthracite grey.

CAPACITY	500 ml
SIZE	22,0 × 7,4 cm
MATERIALS	Stainless Steel

Effortless connectivity: Bluetooth 5.0 and beyond

Bluetooth 5.0 represents a significant leap forward in wireless connectivity for audio devices and has contributed to improving the wireless listening experience by bringing significant enhancements.

Improved sound quality

This technology has introduced a higher bandwidth, enabling faster and more reliable data transmission. This results in improved sound quality, with clearer and more detailed reproduction of music, podcasts, and other audio content.
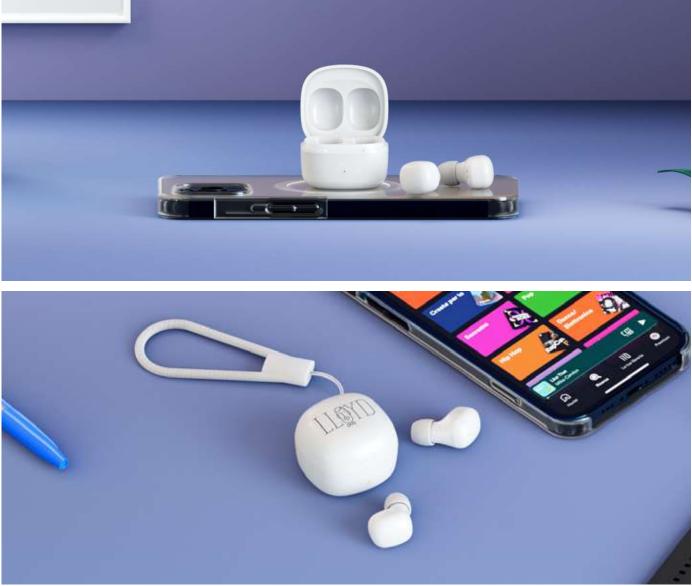

Low latency

Latency refers to the delay between sending an audio signal from the playback device to the headphones and its actual execution in the headphones. Bluetooth 5.0 has significantly reduced latency, ensuring more accurate synchronization between audio and video, thus enhancing the viewing experience of movies, videos, and games.
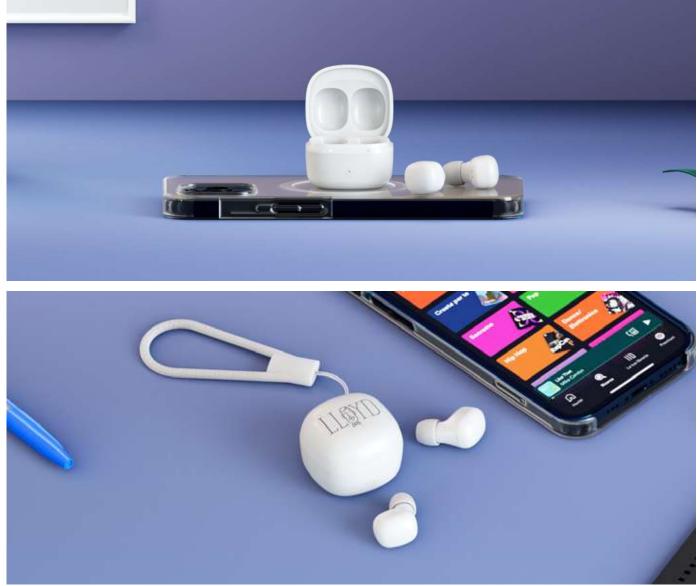

More stable connection

Wireless earbuds or headphones can establish more stable connections with the playback device. The advanced frequency hopping technology of Bluetooth 5.0 reduces interference and minimizes connection interruptions, providing a seamless and uninterrupted listening experience.

Longer battery life

One significant advantage for devices is improved energy efficiency. This results in lower power consumption, extending the battery life. Users can enjoy extended listening without the need for frequent recharging.

Pebble

EP901

The smallest ABS wireless Bluetooth earphones in our entire catalogue. They are the size of a pebble, making them a pocket-sized product. They feature True Wireless Stereo technology and the silicone lanyard allows you to carry the headset with you at all times. The shell can be customised on one side using screen printing or UV printing.

What to know before choosing a Power Bank

The evolution of mobile devices has brought about the need for increasingly efficient and versatile charging solutions. Power Banks have become essential allies in keeping various technological devices powered throughout the day in a convenient and reliable manner.

New models have been introduced, such as wireless and induction Power Banks. The first ones utilize Qi technology to enable wireless charging of compatible devices. Second ones, on the other hand, allow charging simply by placing the device on the induction surface.

To choose the best charging system that suits your needs, you can consider various factors that vary from person to person based on habits, lifestyles, and the devices in use.

The main elements to consider are:

Needs

Assess the number of mobile devices you want to charge and how frequently you use them throughout the day. Additionally, smaller and lighter systems are useful for those who travel or are frequently on the move, as they are easy to carry.

Capacity

Choose a Power Bank with a capacity sufficient to fully charge your device at least once is recommended. Keep in mind that a higher capacity may result in larger dimensions and increased weight.

Compatibility

Ensure that the charging system is compatible with your devices and check if it supports devices with USB connection or specific options such as Power Delivery (PD) technology for fast charging.

Solar

PB095

Solar is a 10.000mAh Power Bank with solar panel and a body made entirely of FSC-certified bamboo, an environmentally friendly material with low environmental impact. It features three ports: a micro USB input, a USB-A output and a Type-C input. Solar can be customised on one side using screen printing, four-colour printing, laser engraving and LED printing techniques.

CAPACITY	10.000 mAh
SIZE	15,5 × 7,3 cm
MATERIALS	Bamboo

Reusable packaging

In recent years, there has been a consolidated trend toward the inclusion of environmental issues in the daily activities and communication of companies, and new initiatives are also being launched in this direction to facilitate the move to an environmentally friendly consumption pattern.

In this context, the use of recycled and recyclable materials is already widespread, both in the manufacturing of products and in the packaging that contains them. However, is it possible to expand the boundaries of this vision and guide one's customers in the direction of eco-friendly consumption?

This is where we got the idea of designing and developing packaging that can initially contain the product, but then offer the possibility of a different use through a change in form, making it a totally unexpected object.

Here, then, is our first small step that can make a difference in the use of materials: a fish-bone shaped cable winder can be made from the box that holds one of our water bottles. You can carry it with you at all times to keep your earbuds and electronic devices cables tidy.

Reuse and waste reduction are certainly one of the current trends, but for us they are much more than that: we recognize our responsibility as a company in reducing the environmental impact on a daily basis and we continue day after day toward the constant search for innovative and sustainable proposals.

Double

TA009

Double is a 20W plastic wall charger that allows two devices to be charged simultaneously thanks to its dual USB-A and Type-C output. It has an extremely minimal and linear design with an angular cut-out. It is available in white and can be customised by silk-screen printing or UV digital printing.

OUTPUT	20W
SIZE	3,0 × 30 × 7,2 cm
MATERIALS	Plastic

Globe Trotter

TA001

The Globe Trotter adaptor is cube-shaped, small and light. The prongs are all inside the shell of the adaptor and can be selected by using a pressure-scroll button. A luminous LED lights up when the adaptor is plugged in and in use. It also includes two USB ports to charge devices.

SIZE	6,1 × 4,5 × 5,6 cm
MATERIALS	Plastic
PRINT	Silk-screen Printing

Grain

CB901

Multiple connector equipped with standard USB cable, micro-USB, Lightning and Type C, all with fast charging function for smartphones or other devices. The hub from which the cables come out is made of wheat fibre (a special assembly of ABS and natural fibre), with a rectangular bamboo insert.
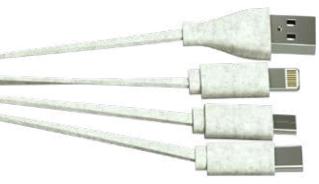

SIZE	16,0 × 2,1 × 1,0 cm
MATERIALS	Bamboo + Wheat
PRINT	Digital Printing, Laser Engraving

Bunch

CB008

Thanks to the double Type C connector and the Lightning and Micro 2 in 1 connector, this multi-cable allows you to connect various devices, up to 6 combinations. When they are not in use, the outer connectors remain securely fastened with a magnet, so that the cable can be attached to ties or keyrings.

SIZE	12,9 cm
MATERIALS	Plastic
PRINT	Silk-screen Printing, CMYK Printing

Loom

CB026

The first cable customizable along its entire length using the Jacquard technique. It is available in 3 different lengths (100, 150, 200 cm) only in the C to C version with Fast Charging functionality and a maximum power of up to 60W. It's the perfect product for charging your devices and transferring data. The internal cables are made from 100% recycled material.

SIZE   Cable lenght 100/150/200 cm
MATERIALS   Plastic
PRINT   Jacquard

Loom double

CB027

The first cable customizable along its entire length using the Jacquard technique. It's a 4-in-1 item as it features two double connectors at each end: one side with USB-A and Type-C, and the other with Lightning and Type-C. The Type-C has Fast Charging functionality with a maximum power of up to 60W, while the Lightning has a power of up to 27W. It's available in 3 different lengths (100, 150, 200 cm) and is the perfect product for charging your devices and transferring data. The internal cables are made from 100% recycled material.

SIZE   Cable lenght 100/150/200 cm
MATERIALS   Plastic
PRINT   Jacquard

Slinky

CB023

4-in-1 magnetic cable in braided nylon for charging and data transfer. It features 2 dual connectors: one side has USB-A and Type-C, and the other side has Lightning and Type-C. This makes it extremely versatile and usable with any device on any occasion. The unique feature of this product is its "spring" design, which prevents the cable from twisting and creating inconvenient tangles. Customization with logos and graphics can be done on all 4 connectors of the cable through laser engraving.

SIZE   10 cm
MATERIALS   Plastic + Metal

Match — GD047

Type-C adapter in version 5.0. The ABS shell available in black. This model can be customized with silk-screen printing or laser engraving.

SIZE	3,1 × 1,5 × 0,7 cm
MATERIALS	Plastic
PRINT	Silk-screen Printing, laser engraving

Braided — CB019

120 cm dual USB-A and Type C connector cable in input with multiple micro-USB, Lightning and Type C connectors all in output. The cables are covered with a woven nylon fibre fabric available in black, blue and silver. The nylon cord makes the cable robust and break-resistant, and while it is extremely flexible, it has an anti-tangle effect because it does not create knots. The connectors of the three cables and the hub from which they exit are made of metal and can be customised with a company logo by laser engraving.

SIZE	120 cm
MATERIALS	Plastic + Metal
PRINT	Laser Engraving

Cord — CB016

Coloured cables with fast charging and data transfer function. With a range of 5A, they are 1 metre long and are available in Type-C to Type-C variant. The cables are made of alloy, ABS and fabric and are available in black, silver, red, blue and green.

SIZE	100 cm
MATERIALS	Plastic + fabric

SIZE	5,7 × 1,2 × 0,4 cm
MATERIALS	Metal
PRINT	Silk-screen Printing, UV Printing, Laser Engraving

Why should I choose a USB 3.0?

VERY HIGH

STRESS

LOW

DATA TRANSFER SPEED

VERY HIGH

Have you ever had to deal with speed-related issues when using a USB interface? A low read and write speed can really test our patience. This probably happens because you didn't know that there is a valid alternative, and it's called USB 3.0.

USB 3.0 technology has revolutionized the external memory drive market, as it provides great advantages in terms of performance.

What advantages?

— Data transfer speed.
This is the main advantage: in terms of numbers, we're talking about a speed that is ten times faster than USB 2.0 technology. However, it must be noted that such speeds can only be reached if the USB port being used supports this technology.

— Compatibility.
Cables and flash-drives that use 3.0 technology are backwards compatible, which means that they can easily be used with USB ports that have 2.0 technology.

How to recognize?

Aesthetically, there is a way to distinguish between a 3.0 and a 2.0 port or connector. The contacts base on the inside is blue, whereas for the latter it is white.

Search in our catalogue for USB flash-drives with 3.0 technology, look for the mark and find all the models available!

USB 3.0

Bend   USB_0008

Metal USB flash-drive available in silver. The memory chip is housed within the body, whereas at the other end there is a large functional round hole for threading cords and accessories. This USB flash-drive is extremely compact in size, with a striking yet simple style.

SIZE	4,9 × 2,2 × 0,5 cm
MATERIALS	Metal
PRINT	Laser Engraving

Metal USB flash-drive with a striking yet simple, slim-line design. The memory chip is housed within the body, and there is silicone loop at the other end to which a small keyring is attached, which is useful for threading cords and accessories.

SIZE	7,7 × 2,0 × 0,5 cm
MATERIALS	Metal
PRINT	Laser Engraving, Black Laser

What is OTG technology?

USB On-The-Go (OTG) is a standardized specification for USB connections that allows a device to read data from a USB connection without requiring a PC.

Our USB flash-drives with On-The-Go technology are equipped with a standard USB connector on one side and a micro-USB connector on the other. This means you can connect your USB flash-drive directly to a smartphone or digital camera or any other device without any wires or cables, to read and transfer your data quickly and immediately.

The USB flash-drives OTG are compatible with Android operating system.

Vortex   USB_8330

Metal USB flash-drive available in silver and gold. The slightly satin and shiny finish enhances the sophisticated vortex motive on the surface. Vortex has an essential, compact design and is equipped with a removable cap. It can be customised on both sides with silk-screen printing or laser engraving.

SIZE   5,1 × 2,0 × 1,0 cm
MATERIALS   Metal
PRINT   Silk-screen Printing, Laser Engraving

Privacy Set

KT006

A set of products dedicated to protecting digital data and the IT safety of smartphones, tablets and computers. It features a USB data blocker; an anti-RFID card and 5 webcam covers. USB data blocker is a USB adaptor which acts like a filter when you are charging your phone from a public source which is considered to be unsafe (for example, USB ports in an airport). The device impedes the transfer of data (both incoming and outgoing, such as malware), allowing only for the power required to charge the battery to be used. The anti-RFID card ensures that credit cards are fully protected from data theft and are fully isolated from magnetic sources. It looks like a card and needs to be kept in your wallet. Lastly, the webcam cover is a small adhesive plastic sticker with a sliding open-close system to apply to your computer webcam with the aim of preventing hackers or viruses to use your device's webcam.

The importance of rebranding: what is it and why promotional gadgets are crucial

By definition, rebranding is the process of strategic change of a company's brand identity. It may consist in choosing a new name, logo, or communication strategy, with the intention of reshaping its identity and positioning it differently in the reference market.

OUR PROJECT

YOUR PRODUCT

A gadget that really talks about you
Your logo and your products are unique and this is the best way to enhance them

Even the budget is customized!
Different price brackets, to suit any budget

### Big projects, minimum quantities
The minimum order quantity is just 100 units!

3D and 2D reproduction of any shape or logo!
Ultimate styling appeal and excellent results in terms of shape and colors

### Make up your own gift set
You can create an entire range of different products with the same customized shape

Sooner or later, all companies need to renovate and "refresh" their corporate image, or address new markets and targets, or strengthen their relationship with their original target.

Whatever the case, one of the most effective ways to rebrand a corporate logo is to make company gadgets to be distributed to customers and employees and on which to imprint the elements of the new brand image.

Our 100% Custom gadgets are simply perfect for the job, as they allow you to reproduce any three-dimensional shape, and to produce a custom-made promotional accessory, whatever the initial idea.

Any other product of this catalogue is actually a perfect candidate for a rebranding project, try a customized promotional gadget, look through these pages for some inspiration!

100% Custom

We offer fully customizable corporate and promotional merchandise that includes gadgets in any shape, color combination, and print. We can reproduce any logo or subject in both 2D and 3D formats, ensuring limitless customization and combining identity, sustainability, and functionality at the same time. We are constantly committed to researching the best materials to ensure the creation of sustainable projects throughout their production and lifecycle, while maintaining our dedication to producing unique and customizable product media.

Fast delivery

The products ready for delivery are shipped from our premises within 24/48 hours from the order confirmation. Delivery takes place in 24 or 72 hours depending on the destination area and the type of product. Power Bank. speakers and all battery-powered products may have longer delivery times because they do not allow shipping by air.

Tailored projects to promote your uniqueness

We work in the consumer electronics market since more than 10 years and we are obsessed with catching innovations as they approach. When we select the products that will be later included in our promotional catalogue, we strive to anticipate our clients' needs, eager to provide solutions for any request we may receive.
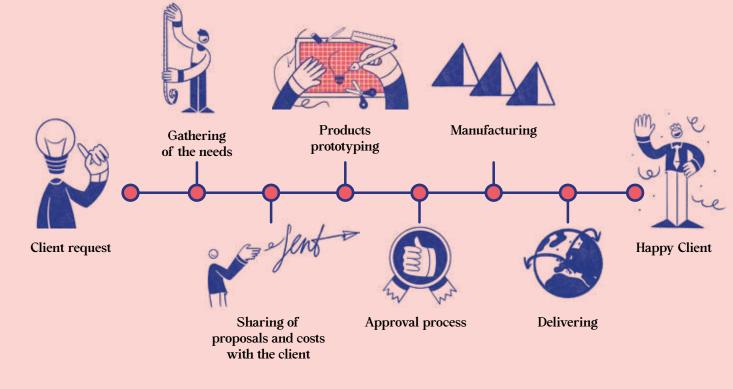

Every company is one-of-a-kind.

However, every company is unique and so are its needs. That is why no standard catalogue could ever meet individual requirements, but we are ready also for this!

"We are specialized in delivering bespoke projects across any industry sector and for any promotional enterprise."

We develop tailored and extra-catalogue products based on the requirements of our clients, so if you haven't found yet what suits you perfectly, all you need is calling on us for a made-to-measure project.

The production line from enquiry to delivery.

From the first touch point to manufacturing, we work closely with our customers to create their company's original equipment.

Let's get real: here is an example of our tailored projects.

The Privacy Set: How to make the most out of the open market offer

One of our clients appointed us to develop a product focused on data protection and IT security. Our research brought us to three products that were not yet included in our catalogue: a USB data blocker, a RFID card and a webcam cover.

This product was so successful that we decided to create a similar one to be included in our catalogue, you will find it on page 159.

The first is an adaptor to place between the charging cable and the USB socket, that allows you to charge safely from any USB socket with no risk of data transfer to/from your device.

The RFID card should stay in your wallet to prevent the theft of the credit card data, and the webcam cover is useful to prevent any virus or hacker from using the computer's video camera.

Together these three objects are an exhausting combination of the data security essentials. All of them have been personalized with the company logo.
We also completed the set with a custom packaging in rigid cardboard and a manual with the products' descriptions and instructions.

Let's Make it WOW
